

## **PRESS RELEASE:**

### **QuietOn launches innovative snoring killer - super small and comfortable active noise cancelling earplugs for sleep**

Having already simplified the lives of thousands of frequent travelers, dentists and patients, the Finnish company QuietOn Ltd. is now clearing the way for quiet and relaxing nights. By incorporating Active Noise Cancelling technology, the tiny earplugs generate the essential elixir for a wholesome deep sleep: silence. Particularly low frequencies, which conventional foam earplugs can only reach to a limited extent, are suppressed so that nocturnal snoring noises do no longer stand a chance. In this way, not only the night's rest necessary for carrying out everyday activities is ensured, but also the one or other relationship quarrel is prevented. Under the slogan "Save your marriage", QuietOn brings serenity back to your bed.

In contrast to other earplugs, however, no additional noise is generated that exposes the sleeping environment to a rain storm, jungle or windmill, by simply masking or crossfading the disturbing sound. QuietOn creates a realm of tranquillity, even when surrounded by snorers, party animals or discussing colleagues at work. Due to their unbeatably small size, the sleep aids fit particularly well and comfortably in the ear and close the auditory canal to all potentially disturbing noise.

The featured battery life is of 20 hours per charge, ensuring that the marital quarrel does not break out again in the middle of the night. The device offers the possibility to choose between sleeping and hearing mode. In this way, it becomes possible to coordinate the length of naps precisely and the journey back to everyday life remains just a tap away. No need to worry about oversleeping: Although the snoring noise of the bed neighbor is suppressed, the alarm tone is not.

The earplugs have already fascinated many technology enthusiasts at IFA in Berlin, sleep seekers visiting Somnex Sleep Show in London, as well as visitors at CES in Las Vegas. QuietOn Sleep is currently available for pre-order in the company's webshop.

*QuietOn Ltd. is a technology company based in Oulu, Finland and established in April 2015. The company's technology heritage is from Nokia. The company develops and produces its own, patented electronic earplugs that utilize active noise cancellation technology. QuietOn's earplugs have been especially successful within frequent travelers and being sold around the world in major airlines.*
